

Street Sweeping: RFP No. 2015-08-PWOPS

Q&A

1. What would prevent a company from bidding any type of sweeper for this project?
Caller elaborated on what parking lot contractors use for parking lot contracts which are the smaller 495 Tymco sweepers and these are the same units that CWS uses currently for their sweeping operations.

A: The RFP specifies a regenerative sweeper. The 495 Tymco is a regenerative sweeper and would be an acceptable sweeper to use for this project.

2. City should require prior municipal experience

A: Question A of the RFP Evaluation Criteria requires the proposer to list three projects/contracts that are similar to the scope of this project.

3. What is the duration of the contract?

A: The contract term will be for one year with four optional one year renewals.

4. How much sweeper debris does the City handle?

A: The City's estimated total last Fiscal Year (July 1 through June 30) was 1,001 cubic yards of material. Also, the City has a curbside leaf pickup program that begins in early November through mid-January of each calendar year and recycles the leaves using other types of equipment.
