

## NE Lenox Street and NE Lorie Drive Culvert Replacement

**Location:** Intersection of NE Lenox Street and NE Lorie Drive

### About

The originally constructed culverts were undersized and prone to being blocked with debris. During intense or prolonged rain events, the creek would rise and flow over the top of Lenox Street and Lorie Drive resulting in damage and closure of the roadway. A new 75-foot long, 20-foot wide, and 7-foot tall culvert was installed.

### Project Funding Sources

The project was funded by the Transportation Fund and the Surface Water Management Local Service Fee (LSF).

### Project Timeline

Completed summer 2018

### Project Cost

Total Project Cost: \$751,082.28

Funded by LSF: \$150,216.45
